

## *6<sup>th</sup> Round of applications for the NanomedTAB is open*

**Paris, July 17<sup>th</sup>, 2017:** The Nanomedicine Translation Advisory Board (nanomedTAB) offers since 2015 a free-of-charge mentoring program to assess, advise and accelerate promising nanomedicine projects to the market, based on a team of top skills industry experts with diverse and complementary experience. The objective? Help all projects and teams to get to clinical and commercial application faster and more reliably.

This **sixth edition** is open to companies, public and private research entities, and other organisations leading innovative nanomedicine projects in Europe

**The deadline for applications is September 18<sup>th</sup>, 2017.**

- ✓ 71 teams have already applied;
- ✓ from 18 countries in EU and beyond;
- ✓ more than 50% have been selected and are now benefiting from coaching over time.

Selected projects will be invited to attend the **next TAB-In Sessions**, a series of face to face meetings with experts to be held on **October 19<sup>th</sup>, 2017 in Malaga (Spain)**, in the framework of the [12<sup>th</sup> ETP Nanomedicine Annual Event](#).

Applications should be submitted through the following link: [www.nanomedtab.eu/?apply](http://www.nanomedtab.eu/?apply).

Further information about the nanomedTAB and its experts can be found at [www.nanomedtab.eu](http://www.nanomedtab.eu).

**About the ENATRANS project** ([www.enatrans.eu](http://www.enatrans.eu))

Enabling NANomedicine TRANSlation, a Coordination and Support Action funded by the European Commission, has been built to help the translation of innovative projects related to nanomedicine to successfully go through the different stages of development from the idea to the patients and improve global knowledge on nanomedicine. ENATRANS is led by a consortium of 7 partners belonging to the European Technology Platform for Nanomedicine (ETPN) and coordinated by VDI/VDE-IT (Germany): CEA-LETI (France), Nanobiotix SA (France), Gesellschaft für Bioanalytik Muenster e.V. (Germany), Tel-Aviv University (Israel), Fondazione Don Carlo Gnocchi ONLUS (Italy), TecMinho (Portugal).

**About ETPN** ([www.etp-nanomedicine.eu/public](http://www.etp-nanomedicine.eu/public))

Created in 2005, the European Technology Platform on Nanomedicine (ETPN), an initiative led by industry and set up together with the European Commission, is addressing the application of nanotechnology to achieve breakthroughs in healthcare. Its mission consists in building, shaping and supporting the European ecosystem of Nanomedicine. In 2015, the ETPN became an independent international Association under the French law 1901, with its Secretariat and headquarters located in Paris, France.

ETPN has developed solid and effective tools under the umbrella of the Nanomedicine Translation Hub aiming to select and help the development of the best innovative projects in Nanomedicine toward the clinics.
